FOR IMMEDIATE RELEASE

PPi Technologies GROUP and their PPi KEN Container Cleaning System is *the* solution for environmentally friendly cleaning of containers for multiple purposes. Their new green system offers up to 75% less water consumption, reduced detergent usage and lower power consumption per unit disinfected. The system is easy-to-load and the process is fully computer controlled allowing remote computer access for diagnostic testing and repair.

This process container and cleaning/disinfection system can handle containers up to 250 gallons in capacity. The environmental washing cycle takes a total time of three minutes including loading and unloading and will disinfect up to twenty containers per hour. This can be a labor cost reduction of up to 50%!

Ken Hygiene Systems is a sixty year-old industrial washing and disinfection leader in the dairy, food, beverage, hospital market segments.

PPi Technologies GROUP, which markets beverage, consumable and StandUp pouch machinery as well as end-of-line systems, is based in Sarasota, Florida. For more information contact ***PPi Technologies GROUP*** at 941.359.6678 or visit www.ppitechnologies.com
