plastopil

Plastopil produces and markets advanced multi-layered packaging films and pouches mainly for the food industry. Plastopil offers extruded and laminated products, which can be printed with flexo or roto gravure. The Plastopil plant with extrusion lines, printers, laminators and conversion equipment provides a comprehensive range of technologically advanced packaging solutions to meet your needs.

SmartDevice™ Lid

SmartDevice™
Patent # 7,240,796 B2

The Domino A-Series continuous ink jet printers have been developed to offer a wide range of reliable coding solutions. The A-Series prints onto a variety of substrates including food, glass and films of all types.

Code Dater

GO-GREEN™
Taking Source Reduction to a New Level

CPT supplies a wide range of eco-friendly and pre-printed trays as well as flexible and rigid plastic packaging films designed to meet your application and green packaging requirements. CPT provides a wide variety of innovative meat, poultry, fish and seafood packaging solutions produced with state-of-the-art coextrusion and lamination equipment. All flexibles from CPT are available in high quality Roto-Gravure or Flex Printing.
